

FEATURE STORY IDEAS

The Black Hole is back with a wilder attitude – Orlando showcases the latest advances in technology with the dramatic new upgrade of one of its most popular rides. The one-of-a-kind attraction, **THE BLACK HOLE™: The Next Generation**, re-launched May, 2008. Experience an explosion of pulsating lights, dynamic effects and cosmic energy as your two-person hydra capsule blasts off to new out-of-this-world thrills! Your space adventure is programmed especially for you, and you will encounter unique and different experiences with each journey.

A history of Wet 'n Wild, the nation's first waterpark – In the mid-1970's, George D. Millay, founder of SeaWorld, left his successful marine-life theme park to concentrate his efforts on creating the world's first waterpark, Wet 'n Wild – Orlando. The park opened in 1977 and was the first in amusement history to feature participatory water activities and attractions. Today, Wet 'n Wild – Orlando is still one of the nation's best-attended waterparks.

A day at Wet 'n Wild with the entire family – Wet 'n Wild has more for families to do together than any other waterpark in Orlando! Mom and Dad can relax and drift away on the lazy River or the Surf Lagoon wave pool, while thrill seeking teens can experience the ultimate free-fall on the Bomb Bay or the Der Stuka. Little ones love the Kids' Park with miniature versions of the park's most popular adult rides – there's something for everyone to do, no matter how young or young at heart you are! And if the family wants to spend time together, they can enjoy a wide variety of multi-passenger rides in tubes big enough to hold the entire family!

Tips on water safety – How do you stay cool during the summer! With water, of course! With more than 400 lifeguards on duty every day, Wet 'n Wild has many experts on the subject of water safety. Wet 'n Wild staff can educate the public on everything from pool care and maintenance to life-saving water safety techniques, especially important in the summer time when more children are cooling off in swimming pools around the country.
